Alright.

Eric, Monica - please go live at 8:00 this morning as discussed and do not include any language related to the samples. When provided later, we can add. Thx

We're working on the updated language. If you need to go live, please do not include any language. The previous language is being updated and the version you have is no longer valid.

Thanks.

Subject: ITC Story Map Screen shots

Hi Lahne,

I'm sending you screen shots of the story map with our idea on where we will insert the proposed language currently under review. The first screen shot is the "why are we conducting sampling" screen. It contains photos of our sampling teams and an explanation of what we're doing.

The next slide is the sample map. This map will contain the sample locations with data that has been released to the public. The first five sample locations (SVOCs, VOCs, Oil&Grease, COD, and PFAS/PFOA method 537.1 modified) will be displayed with the first release. We can include messaging as a text box similar to the screen above to include the pfas statement and other analytical messaging. The user will be able to click on the sample location and see analytical results for the locations they click on.

Please walk Nancy and David D through this.

Thanks

Eric Delgado
